Fall

BULL SALE

1 PM WEDNESDAY

DECEMBER 11

Bow Slope Shipping Association 2024
Brooks, Alberta

54 Long Yearling
Purebred Black Angus Bulls
500+ Commercial Bred Heifers
& 2nd Calvers

*Including 66 Ranch Purebred Black Angus
Bred Heifers - Selling as Commercials*

66 Ranch Ltd. • Kelsey Campbell • 403.362.0672

Welcome

Welcome to our 11th Annual Fall Bull & Female Sale. We would like to Thank You, our past customers for your purchases and to all of you new to our program, we truly are humbled that you have taken the time to evaluate our program.

This fall on offer we have 54 bulls from our early May calving program. The bulls on offer are born from May 1st to May 10th. The calves born up and until April 30th are destined for our Spring Sale as yearlings, and the bulls born after May 10th are held over and grown into two year olds for our Spring Bull Sale. The same as our past sales we took the time to take pictures of all the feet of the bulls on offer. You can find the videos and feet pictures at www.66ranchltd.com.

A little different twist to the female part of our sale this year. We decided to add a few more 2nd calvers and anticipate to have 180 head on offer. 80 of these will have no brands. As well we will have 53 head of 1st calf heifers from our purebred program selling as commercials. 110 head of 1st calving heifers from the heart of our commercial herd, these heifers are also NVB. And also have 82 heifers on offer from a great customer of ours. And a few consignment groups this year, we will be selling 20 heifers from Rafter 7 Ranches, 45 heifers from C&L Beasley that are NVB, and 40 heifers from Daniel and Jaclinn McNiven all sourced from Chad and Dan Sewall. With all that being said we expect to be selling 500 head plus of females. All with a short breed on them.

Whether you need to purchase any bulls or females for replacements for your herd, or you are just interested in viewing our cattle for the first time. We would really appreciate it if you could join us after the sale for an evening of socializing and a little "country hospitality!"

Thanks

Kelsey, Malissa, Brett and Carter

VIEWING: Bulls & females will be available for viewing at Bow Slope Shipping Association, on Tuesday, December 10.

PURCHASES RISK: Each animal becomes the risk of the purchaser as soon as sold. Insurance will be available sale day with Canadian Farm Insurance - Jill Wildman 780-305-1146.

BREEDER'S GUARANTEE: All the bulls will be semen tested and physically examined by our local vet and sold with a breeders guarantee. ***EVERY BULL at the sale will be sold with a 100% satisfaction guarantee.***

SIGHT UNSEEN: In the event you are unable to attend the sale or use the online option, bids can be given to sale staff or owners with satisfaction guaranteed.

CAN'T MAKE IT ON SALE DAY?

Our sale will now be broadcast online @

We are pleased to announce that we will have the services of DLMS. This will allow you to bid on the bulls and heifers via the internet. Of course, we would rather you attend the sale and our hospitality afterwards, but we well know today's world just keeps getting busier and busier! But, if for some reason you cannot attend, this gives you the opportunity to bid on the bulls and heifers at the live auction. Please remember to pre-register at www.dlms.ca 24 hrs. prior to the sale.

We also have available with this service is a live video of every animal in the sale. To view these videos go to our website www.66ranchltd.com and just click on view catalog. Videos are also available at www.dlms.ca. We encourage you if possible to view the cattle at the ranch prior to the sale.

Please contact Mark Shologan @ 780-699-5082 or the DMLS Purebred Team @ 780-991-3025 with any questions or issues with registering for the sale.

PERFORMANCE DATA

AOD: Age of Dam

BW: Actual Birth Weight

205D: Weaning weight in lbs. adjusted to 205 days

365D: Yearling weight in lbs. adjusted to 365 days

EPD EXPLANATION

CE: Calving ease, predicts the ease with which a sire's calves will be born when bred to first-calf heifers. The higher the number, the higher the probability heifers will calve with no assistance.

BW: Birth weight, a prediction of a sire's ability to transmit birth weight to his progeny.

WW: Weaning weight, predictor of a sire's ability to transmit weaning growth to his progeny.

YW: Yearling weight, predictor of a sire's ability to transmit yearling growth to his progeny.

MILK: A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters.

MCE: Maternal calving ease. The higher the number, the higher the probability that daughters will not require assistance at calving time.

The 2023 Angus Average EPDs are as follows and are the numbers to compare the bulls in this catalogue to:

EPDs	CE	BW	WW	YW	MILK	MCE
	+3.3	+2.0	+54	+95	+23	+6.4

EPDs in this catalog are as of Nov. 1/24

PLEASE NOTE:

- Calving ease bulls: **BW** in **BOLD**
- No bulls have been sold prior to the sale
- Bulls are sold in catalog order
- Heifers and 2nd Calvers sold at the end of the sale
- Updated weights & scrotal measurements will be available Sale Day
- 66 Ranch reserves the right to draw 250 straws of semen at our expense and at your convenience on any bull selling in the sale. For in-herd use only.

An extremely deep sided walking bull purchased from Hamilton Farms. We selected him for his calving ease and extremely good performance. His dam is a favorite at Hamilton's, a moderate framed cow with an excellent level udder. We sadly lost 135G through the winter of 2021 to an injury, fortunately though we have semen in the tank to utilize his genetics for years to come. Bull calves average birthweight is 80 lbs. Heifer calves is 76 lbs.

A Merit Cattle Co. bred bull we were able to purchase at Mar Mac Farms Dispersal Sale. We fell in love with the progeny we saw by 7035E. The daughters make you drool with big middles, wide tops, hairy and super docile. The bulls look like bulls should, crested necks, big hipped, big middles, big nuts and great feet. We are very pleased with the 7035E sire group. Bull calves average birthweight 86 lbs. Heifer calves 80 lbs.

A walking bull we purchased from McCumber Angus Ranch. A calving ease bull with a ton of performance. An incredibly beautiful head on this bull, with as much style, rib capacity and ease of flesh as you will find in a herd bull. We purchased this bull because of his maternal greatness, quoted from the footnotes in their catalog "1169 represents well what our program is all about. Stacking as many top cows into the pedigree as possible. It can't get much better than this here." Multiple, multiple donor cows on both the top and bottom side of his pedigree. And the other neat thing is we seen 5 of the 6 cows in the front of 1169's pedigree on the ground at their ranch. Bull calves average birthweight is 82 lbs. Heifer calves is 77 lbs.

BERRY CREEK VETERINARY CLINIC

The bulls offered for sale by 66 Ranch have all passed a breeding soundness examination and are classified as satisfactory potential breeders.

The heifers and second calvers have all been examined to confirm pregnancy.

In my opinion the Angus seed stock offered for sale are in excellent health and in ideal body condition.

I consider this offering to be very good replacement stock for the commercial or purebred herd.

*Sincerely,
Kirby Finkbeiner, DVM*

A walking bull at the ranch purchased from the Hoover Angus operation in Iowa, well known for producing super females with their genetics. We selected 222H for his ability to calve to 1st calf heifers as well bring superior growth after they are born. 222H is one of the favorites at the ranch for the extra rib he definitely carries. A super footed, long, moderate big hipped bull. Use his sons confidently on your heifers. Bull calves average birthweight is 75 lbs. Heifer calves is 66 lbs.

A walking bull raised by 66 Ranch. We chose to keep this 1D son because of the muscle expression he carries so proudly and for his superb foot quality. 156H's dam was the largest reason we chose to use 156H in our purebred program. She is possibly one of the best 17Z daughters we have raised to date. 403C has an absolutely impeccable udder and her dam 310N has been flushed here at our place. We don't choose to flush too many cows here at our place until they have proven themselves. Grandam 310N was flushed at the age 16, but we unfortunately lost her just before her 18th birthday. Longevity and fertility are bred into the 156H sons from the maternal greatness on the bottom side of his pedigree. Bull calves average birthweight is 85 lbs. Heifer calves is 75 lbs.

A walking bull at the ranch purchased from the super people at Merit Cattle Co. Trent and Janelle Leibreich. We purchased him because he was in our eyes one of the longest, deepest, yet moderate herd bulls in their pen that season. But the determining factor for us deciding to own him was the maternal value he would bring. 6 of the 7 cows on the front of the pedigree were all raised at Merit. Proven, predictable maternal breeding bull here. 32H has and will continue to be bred to some of our top females at our place. Be sure to plan to retain all the heifer calves from 32H, they will be in the replacement pen and in the cow herd for a long time. 32H sires calves with exceptional foot quality. Not unexpected by the foot quality his dam has, as near a perfect foot with exceptional heel as you can find. His dam 6060 has produced many quality herdsires selling to multiple well respected seedstock producers besides Kingpin 32H himself! Bull calves average birthweight is 84 lbs. Heifer calves is 78 lbs.

LOOKING FOR LONGEVITY?

A cow at 66 Ranch is under great scrutiny from her first calf and continuing on her entire life at our place. If they show any imperfections with feet, udder or disposition they are culled right there on the spot. Any cow 4 or 5 or 6 has been scrutinized pretty thoroughly. So with that being said, we are pretty proud to have almost half the cows that raised bulls in this sale being 6 years and older up to 11 years of age!

A walking bull purchased at Merit Cattle Co. Better known around our place as "Ranchwater". Ranchwater stands on a foot as good as you will find. All four feet have toes that are straight as a ruler and he has as much heel under him as you can put on a foot. You will wear out a pickup truck driving around the countryside to try and find a bull with a foot as strong as this bull! He is a sleep all night heifer bull with a dam behind him that fleshes up as easy as you can make one. For a sure fire heifer bull, he sure puts a hip, middle and a topline onto his progeny. The docility of Ranchwater is unmatched. Super excited to implement Ranchwater's genetics going forward in our program! Bull calves average birthweight is 75 lbs. Heifer calves is 71 lbs.

A walking bull raised at 66 Ranch. What a maternal powerhouse!! Leachman Right Time on top and the dam is one of the best Alliance bred females at the Ranch. Longevity from Right Time, we have Right Time cows last until 17 years old. The Alliance will give you the perfect udders you are looking for as well as the extreme docility we all like. The neat thing with Alliance bred into the Right Time, is this sire has great scrotal, with that, the fertility will be passed onto his progeny. Bull calves average birthweight is 83 lbs. Heifer calves is 78 lbs.

Dam Photos

The photos of dams in this catalog may not be the traditional combed up, blown off "Pretty" pictures most people use. These are pictures of our cows in their working clothes.

For any of you that are not completely familiar with our program, we take a photo of all our cows when we tag their newborn calf. This way we can see their bags anytime of the year, and are available to show all of you our cows when their bags are at their fullest, moments after they calve.

A walking bull here at the ranch purchased from Merit Cattle Co. We purchased 1138J for his moderate birthweight with great growth to use on our first calf heifers. His sire Thunderstorm 807F has an absolutely outstanding foot under him, with a tremendous amount of heel. His dam Flora 6078D is an ideal of an Angus cow as you will find. Impeccable udder. Expect the calves to come easy and grow. And as well, plan to retain the daughters, they will be the kind that will be around a long time! Bull calves average birthweight is 78 lbs. Heifer calves is 71 lbs.

A walking bull at 66 Ranch purchased from Merit Cattle Co. We selected 1001J besides for his amazing growth from birth to weaning to yearling weight, but also because of the maternal power and greatness that raised him, Flora 6078D. She is a mainstay in the donor pen at Merit and we feel she is as ideal of an Angus cow as you will find. Picture perfect udder, feminine, moderate, easy fleshing, near perfect footed and doesn't seem to matter what they mate her to she cranks out herd bulls. 1001J's bull calves average birthweight is 88 lbs. Heifer calves is 78 lbs.

A bull used at 66 Ranch by A.I. We were determined that 1054J was going to walk the pastures at 66 Ranch, but in a hotly contested battle at Merit's sale to purchase him we were overcome on the purchase of him by the great folks at Duralta Farms and Bar EL Angus. But we were absolutely thankful that those great folks at those two reputable outfits were gracious enough to allow us to purchase some semen on this powerhouse of great genetics! A female maker through and through. 1054J is backed by the absolutely beautiful female and herd bull maker, Flora 6078D. I think if you read through our herdsire footnotes you may see a common theme here of this prolific cow Flora 6078D. On the top side of 1054J's pedigree is U2 Coalition 206C, a proven bull backed by another outstanding female U2 Erelite 109Z. You will want to keep all the females that are sired by these 1054J sons! Bull calves average birthweight is 84 lbs. Heifer Calves is 78 lbs.

An A.I. heifer bull we used from Cole Creek bloodlines. Extreme docility with a very moderate birth weight and has excellent performance. We ourselves are very pleased with the growth of these cattle after they were weaned. Competing very well with all the other performance sires. Once again, going back to Cedar Ridge these cattle are displaying that natural ease of flesh. The real "cow mans" kind of cattle! Excellent females sired by Cedar Wind with superb udders. Bull calves average birthweight is 76 lbs. Heifer calves is 70 lbs.

A walking bull at our place purchased from Hoover Angus. We selected this bull for his added growth and his absolutely perfect feet. His dam walked the pastures at Hoover's until the age of 16 years old. They pictured her feet at the age of 14 and they are some of the straightest toes I've laid eyes on. Hoover No Doubt the sire, is also known for having a super strong foot. So if you are wanting to grow big steer calves that weigh up, and are wanting females to be in the herd for a long time. Make sure you take a look at the 6H sons on offer. Bull calves birthweight is 85 lbs. Heifer calves is 80 lbs.

A walking bull we purchased from the great people at McCumber Angus Ranch. We chose to purchase 1004J for his natural ease of flesh, his moderate birthweight and very respectable weaning weight. The biggest reason we chose 1004J was for the dam that raised him. She is a huge middle, incredible udder, feminine, gorgeous female. The dam 2012, pictured below, has raised herd bulls used at McCumber Angus Ranch and is part of their donor program. Bull calves average birthweight is 83 lbs. Heifer calves is 74 lbs.

A walking bull at the ranch raised by us, a "1D" son. 1D has quickly risen to the top at our place. Raising sons like 48G that are just the right type. Both 1D and 48G stamp their calves the same. Deep, soggy, soft made, moderate, easy to look at Angus cattle. Foot quality is very strong, udders on our milking daughters have been absolutely outstanding! 48G's dam is about as good as they come, expect females out of the 48G sons to remain in the herd for a long time. With very moderate birthweight on the dam's side and 1D having moderate birth, feel safe using 48G progeny on 1st calf heifers. Bull calves average birthweight is 78 lbs. Heifer calves is 76 lbs.

Plain and simple, 17Z has it all. Performance, ease of flesh, leg structure, super foot, free moving, maternal. We feel we have lucked out and finally raised one that can compete with any A.I sire. His heifer calves are extremely feminine and by far the top end of the pen. Very moderate birth weights out of 443 calves, 86 lbs. average on the bull calves and 78 lbs. average on the heifer calves. We find it much easier to have confidence in A.I.'ing to a bull that you know exactly what his sire is and as well his dam. Because they both came from our program.
